

Finding the full text of journal articles using Salem Health library databases

Follow these instructions for finding full text copies in PDF format for the journal articles you are looking for.

Linking to full text from databases

- Go to the **Staff Library homepage** on the Salem Health intranet (<https://salemhealth.sharepoint.com/sites/StaffLibrary>) or, for remote access, go to <https://salemhealth.org/community-health-education-center/library-services/databases>.
- Select **SuperSearch** and log-in to the **OpenAthens** portal with your Salem Health network ID and password (for Salem Health employees) or your email address and password (for OpenAthens account holders).
- Perform your search (using key words or the title of an individual article) using the search box and click on the **Access options** drop-down menu (you may need to click on the article title to view the article record).
- In **SuperSearch** a full text link will be one of the following:
 - **PDF Full Text**
 - **HTML Full Text**
 - **Full Text from OVID**
 - **Full Text via ClinicalKey**
 - **Full Text Finder**
 - **Online full text**
 - If there are no electronic full text links, look for a link to search for a freely available PDF copy of the article via **Google Scholar**.
 - If you can't locate a full text copy using Google Scholar, click on the **“Request this item through interlibrary loan”** link. Some restrictions apply, and document delivery can take 1-3 days.
- In any of the **Ovid** databases (Ovid-Medline, EBMR, JBI), a full text link might look like:
 - **Article as PDF**
 - **Full Text**
 - **JBI Database PDF**
 - **EBM Full Text**
- In **ClinicalKey**, a full text link might look like:
 - [article title] ... 

For **PubMed** searches, if you want to get from PubMed records to full text of articles via our Staff Library databases, you need to first click on our [Staff Library PubMed link](#).

-  Full text is available through one of our Salem Health Staff Library databases, or else can be requested via interlibrary loan.
-  Full text is available in PubMed Central
- Some publishers also provide free full text. Just look to see if their publisher icon indicates free full text.

The A-Z Journals List

The [A-Z Publication Finder](#) allows you to search for a particular journal or other publication in multiple Staff Library databases and access the journal's landing page where you can browse issues or search within the publication.

Accessing Full Text via Google Scholar

- Go to <http://scholar.google.com>.
- Freely available full text for articles will be marked to the right of the title on a results page with [PDF] or [HTML]. Occasionally these links do not in fact lead to free full text.
- Click on the link for other versions to see different records for the same title. Occasionally you will find other free full text copies there.

Assistance

Need help? Please contact Paul Howard, Salem Hospital librarian, at 503-814-1573 or library@salemhealth.org. I can track down any article you are looking for at no charge and can also perform a literature search on a given clinical topic.
