

H&P Intervals In Preop - Surgeon

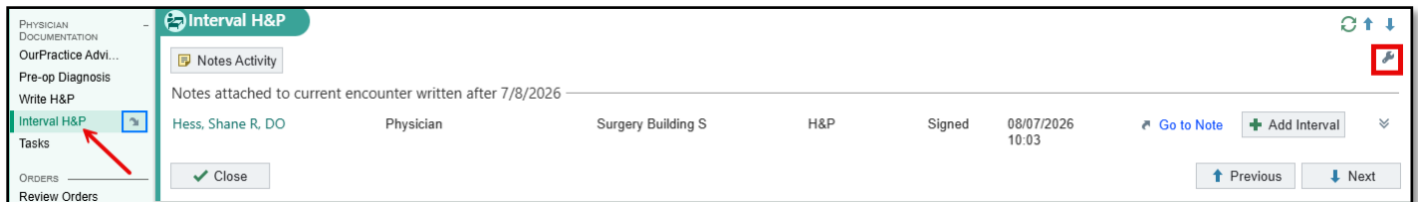

H&P, Progress Note, and Consults note types will now be available to attach to the surgical case for the surgical case H&P note. The attached document will be available for the Interval H&P note in the Preop navigator.

- Scanned H&Ps will now be attachable to the surgical case and will be available for Intervals and Procedure Pass workflows
- The H&P Update note will no longer be an available note type because it does not link to the surgical case and has no association with the procedure done.
- The Update H&P navigator section will now appear as **Interval H&P**

Try It Out

Configure an H&P note and/or an Interval H&P note to best match your note-writing habits.

1. Open the Notes personalization window by clicking the wrench icon in the upper right corner of the Interval H&P navigator section

2. In the When Creating a New Note section , enter the SmartText or SmartPhrase that should be used as the default H&P interval note text in either the SmartText or SmartPhrase field.

When Creating New Interval H&P Notes

SmartPhrase:

-OR-

SmartText:

3. Make Speed Buttons In the Note Speed Buttons section of the Notes Personalization window., create buttons that add a certain Smarttext to the note for common patient types such pediatric patient or a high-risk patient Add this SmartSet to an H&P note by selecting from the drop-down menu in the navigator section to the right of the Add interval button.
