

## Campus expansion year in review

Building A and the emergency department parking lot in early January 2020.

Executive leadership team members at the ground breaking ceremony.

Demolition of the ED parking lot.

CEO Cheryl Wolfe breaking ground in an excavator.

Construction of the tower crane in March.

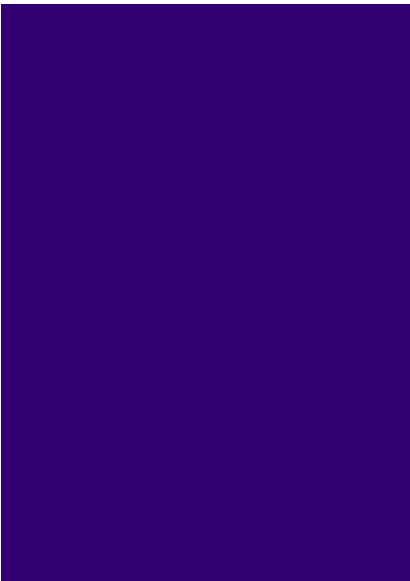

Foundation poured and dry by late spring.

The beginning of steel work in June.

Salem Health staff and providers signed the final steel beam before its placement in the Aug. 13 topping ceremony.

The emergency department covered driveway became visible as the steel reached completion.

In the future, patients and visitors going to the emergency department will turn off Capitol Street, drive under this covered area and drop off at the door or proceed to parking in the garage.

View from the ground between Building A and the expansion.

January 2021

Exterior façade work transforms the building daily.

Click here to watch a time lapse video of construction so far.
